

3, 2, 1, Lift Off: Å KODAâ??s New Galactic Advert

Description

Å KODAâ??s new Superb Combi is transformed into a space rocket in their latest advertising campaign, with equally monumental pre-cleared music from Sean Redmond.

One little boyâ??s dreams of becoming an astronaut come true when he takes a ride in his familyâ??s car. As the engine is started, the family experience zero gravity, complete with flying chocolate bars and phones. Added to the adventure, is our latest work of music licensing, a bespoke composition from London-based composer Sean Redmond. The moving sync license provides the cinematic-feel of a real space adventure.
