

Music composition with the taste of cherry blossoms | Shiseido China

Description

For Shiseido China's commercial, we were honored to be in charge of the music composition of this project.

Beginning with a transparent actress's close-up, the second half is an impressive picture of cherry blossom petals blowing in the wind.

It was also necessary to express the delicate beauty with the music. The first half has a slightly mysterious impression, with the feeling of anticipation. Towards the second half, the impression gradually becomes brighter and the rhythm is added.

This is the completed work:

This was a project with a Japanese director and a Chinese production company. We had careful discussion through online meetings and were able to create the ideal piece.

At Tracks & Fields, our experienced staff will be happy to assist you in providing the best song for your project.
